

The 2006 ARRL Field Day Results: It's Our Time to Shine...

Dan Henderson, N1ND

ith a tip of the cap to Joe Walsh, WB6ACU, to the tune of his hit "Life's Been Good":

*The summer's coming; June's heading
our way
We hams all know what that means — it's
Field Day.*

*Spend weeks of planning to get it all
right*

*So we can have one memorable night.
They say hams are crazy and we've all lost
our mind
We're just looking for Qs and to have a
good time
Field Day — it's our time to shine.*

It's the talk of almost every Amateur Radio club in the US and Canada at some point in time during the year — ARRL Field Day. Some groups start planning the day this operating event ends the previous year. Others will wait and do their preparations beginning only a few weeks before the event. Most groups start kicking around ideas early in the calendar year — giving clubs about six months to prepare.

The numbers in 2006 again show what we all already know — that Field Day is the most popular on-the-air operating activity in Amateur Radio. An official total of 2169 entries were received from groups and individuals from all 80 ARRL/RAC sections — a clean sweep! Even the elusive Northern Territories section made an appearance, as VE6RI/VE8 submitted in the B2C category. These entries represent a reported total of 32,506 participants; the numbers don't include those who participate from home and didn't submit a Field Day summary for inclusion in the results.

The total number of contacts completed during Field Day 2006 was 1,236,825 — slightly up from 2005 by about 19,000 contacts. There were slight increases reported on CW and Phone, while digital contacts had 300 fewer completed contacts. That's not bad for a year at the very bottom of the sun spot cycle. As we see the beginning of Cycle 24 in the next 12-18 months and a return to some better propagation on 10 and 15 meters, we could be facing an all-time record number of contacts in the next few years.

*In parks and plazas, and in EOCs
We set up where all of the people can see.
The stormy weather may cause us some
fits*

And old transceivers may drift just a bit...

Field Day is the best public relations opportunity that Amateur Radio has during

the year. It is exciting to see that 1450 of the entries received were from groups and individuals in Class A or B — the two categories that require setup away from your normal shack. It is also interesting to note that a total of 1847 received entries were operating from non-commercial power mains — that's

"Look What I Did!" Joseph Hood, as assisted by GOTA coach Jason Campbell, KG4WGB, made the last official contact for Radio Amateur Club of Knoxville, W4BBB.

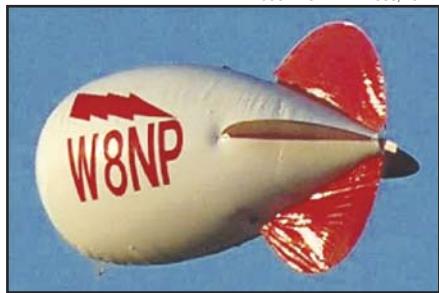

No, not concert roadies... The scene at Le Club de Radio Amateur de Beauce, St-Georges, Quebec, VE2CRB, was typical all over, whether you spoke French, English, Spanish or that strange language known as "the code." Très bien!

The Metroplex Amateur Radio Club and the Ramsey (New Jersey) Office of Emergency Management joined forces for Field Day 2006. (Left to right): Tom Bennett, W2TAB; Hudson Division Vice Director Joyce Birmingham, KA2ANF; Ramsey Mayor Richard Muti, and Michael Adams, WA2MWT, Ramsey OEM Coordinator get ready to start the day.

The Maui Amateur Radio Club, KH6RS, probably set a record for the largest average distance per contact, since they claim all of their QSOs were at least 2000 miles in distance! Not a bad place to "Take a Look Around."

It wasn't hard to find the Massillon Amateur Radio Club, W8NP, Field Day site. Just look for the soaring "Eagle."

an outstanding 85 percent of all entries. The lessons we learn from operating away from the comfort of the home shack and commercial power really are one of the principal focuses of this operating event. And don't sell short those operating from the home shack with commercial power: in an emergency, everyone has a role to play, whether they are Class A operating on battery power QRP from a tent at the local fire department, or sitting in front of the well-equipped shack at home. One of the lessons learned from last year's hurricanes is that every station has a task to perform — and Field Day is the time we can test our capability and fine tune our procedures.

In reviewing the almost 300 online soapbox entries for Field Day 2006, you get a great feel for how groups and individual approach the task they are presented. There are hundreds of photos submitted by the clubs, showing everything from GOTA and youth participation, to innovative station setups and operating locales. Make sure to visit the Online Soapbox at www.arrl.org/contests/soapbox and see what your fellow hams are doing. Simply select 2006 Field Day from the drop down box, and be ready to spend some time viewing creative ideas! And make sure

to add your contributions to this site.

Vintage radios always seem to be found during Field Day. It is exciting to see old-time gear that "glows in the dark" in operation. Occasionally we get a few warbles and chirps, and generally a VFO may drift a tad — but that's part of the challenge of Field Day. Whether you are an old-timer reliving the "equipment of our youth," or a newcomer who is seeing an old tube-type transceiver for the first time, vintage radios in operation are part of the heritage of our hobby — and Field Day is a great time to see them in action.

We set up GOTA, and satellites too

We show the mayor just what we can do

With code and voice and with new PSK

It ain't like work and it ain't just like play.

We try to get lucky and make TV news.

Everybody call — CQ — CQ.

With all the fun, well you know you can't lose

Field Day — it's our time to shine...

Bonus points are the real heart of Field Day. They are offered because they encourage amateurs to invest in the most important parts of the operating event. The success or failure of Field Day does not depend on the number of contacts you complete or the QSO points that you rack up. A successful Field Day really comes from maximizing the bonus points that you earn for the operation. If you analyze what bonus points are available, you will realize they are offered generally for doing three types of activities.

The first activity is maximizing the visibility of Amateur Radio in your town and community. The parking lot of the local shopping center may not be the most convenient place to put up towers, but you can rest assured that a temporary tower in a highly trafficked locale will attract some interest from passers-by. Set up at the central picnic shelter at a city park and you will have some curious

people asking what is going on. That's where your information table and greeters are important. The story in the local newspaper or on the 6 o'clock news may not bring hordes of visitors to your site, but if it stirs up a little interest, you come out ahead.

When potential served agencies are invited and attend your Field Day, you have another opportunity to build stronger working relationships. A town councilman who has visited your site and seen the community service you can provide may be more inclined to work with you when an antenna zoning issue comes up. The local Emergency Management Coordinator will be pleased to know he has another "tool" to use in a communications emergency. Those couple of hundred bonus points may mean more opportunity for your group to be of service down the road.

The second purpose of the bonus points is to challenge individuals and clubs to experiment and innovate with new technologies or

No "Funk 49" here, as it looks like the radio gods were smiling on the N0LP operation.

to try an operating activity they haven't used before — in particular, the use of alternative power sources and nontraditional communications modes that could be successfully used during an emergency. The key to being a demonstration mode is to do something that would be "useful during an emergency." Things like APRS and Amateur TV can become integral parts of emergency operations. As other technologies are developed with useful applications to this area of emphasis, they will become eligible for inclusion for bonus points, as well. Remember: something that you can already earn regular QSO credit for (such as PSK-31) may be a new mode to you,

but it is well-enough established in the main stream that it earns QSO points, and is thus not eligible for the additional bonus points.

The third — and maybe most important — bonus point area is for developing new operators and recruiting new people into the service. This area is intended to provide hands-on activities for those not already "radio-active." Judging from the photos submitted for the Online Soapbox, many groups placed a premium on the GOTA and youth elements of Field Day 2006. After all, without a continual influx of new operators coming into the hobby, Amateur Radio is destined to go the way of rotary

phone and smoke signals.

Congratulations to each group that made a concerted effort to maximize bonus points in the three areas of visibility, innovation and recruitment! You can consider yourselves winners of Field Day!

Some stay up late and work stations 'til four

It's hard to stop when you want to work more.

*It helps us plan for that emergency
Training for folks just like you and like me.*

Field Day is about setting realistic goals and trying to achieve them. For some groups, it means trying out new club generator or a new portable communications vans. The goal for your group may be to beat the score of the crosstown rival. It may be training members of your ARES group on procedures for accessing the radio room at the County EOC, or getting 10 participants making contacts at the GOTA station. Whatever the goal, it is important to realize that Field Day begins and ends with *fun*. So whenever you start your preparations for Field Day 2007 — scheduled for June 23-24 (always the 4th full weekend in June) — don't forget to bring the polish... because it's our time to shine!

Can't say we're lazy when the results are in.

Everybody say 73 — 73.

Learned something new, so in fact we all win

Field Day — it's our time to shine...

Scores

Class A stations are clubs or groups operating with more than two operators. Score listings are grouped according to the number of transmitters in simultaneous operation. The listings show club or group name, call sign(s) used, total number of QSOs, number indicating power output used (5 is less than 5 W, 2 is less than 150 W; 1 is more than 150 W), number of participants and total score including bonus points and ARRL section. Scores are listed from highest to lowest in each class. Class B stations are portables manned by one or two operators. When there are two operators, the other operator's call is listed in parentheses, if it is known. Class C stations are mobiles. Class D stations are home stations using commercial power. Class E stations are home stations using emergency power. Class F stations are EOC stations.
